Summary

Full Stack Web Developer with a background in Market Research possessing a passion for architecting modern web applications by writing clean and organised code. Effective team player who thrives on continuous learning and experimentation, and having a strong attention to detail. Known to have a creative and mathematical mind, and willing to apply this to solve problems acutely and design innovative, dynamic and user friendly interfaces.

Technical Skills

Languages: HTML, CSS (including Bootstrap), Javascript + jQuery

Applications/frameworks: Node.js, Express, MongoDB, MySQL, MVC Framework, Heroku

Version Control systems/platforms: Fluency with Git version control, Github

- Ability to dynamically configure full stack web applications using Handlebars.
- Solid understanding of data structures using SQL and NoSQL databases whilst operating on the Model View Controller framework.
- Experience with and understanding of developing RESTful APIs using JSON.
- Understanding of open source environments.

Soft Skills

- Solid ability to work collaboratively with team members whilst providing direction.
 - Confidence to work autonomously.
 - A sound eye for detail and perfection from code line 1 and beyond.
 - Excellent written and verbal communication skills.
 - Analytical and problem solving abilities.
-

Projects

Project 1 - My Dream Home | **GitHub:** <https://github.com/bdcoelho/Project1> | **Deployed Project:** <https://bdcoelho.github.io/Project1/index.html>

- Designed to simplify house hunting process by rendering a list of relevant property listings and computing the travel time between the users' work address and the property.
- Core responsibilities: UI/UX design, javascript to retrieve and render API data.

- Technologies used: Javascript / jQuery, HTML, CSS, Domain API, Distance Matrix API, Materialize CSS.

Project 2 - MyStock Pal | Github: <https://github.com/kube-consult/Project-2-trading-platform> |
Deployed Project: <https://fast-lake-54569.herokuapp.com/userSummary>

- A finance application built for the novice trader allowing them to add stocks to their watchlist, buy and sell stocks and read the latest market news.
- Core responsibilities: API data retrieval, HTML rendering.
- Technologies used: Javascript, HTML, CSS, MySQL, Node.js, Express, Express Handlebars, Sequelize, Unirest, Passport, Sessions, Bootstrap, Yahoo Finance API, Morningstar API

Experience

Panel Manager / Insights Analyst

Jan 2019 - Present

The Interpreters | Richmond, VIC

Managing an online community, utilising strong attention to detail and analytical thinking to read and interpret data, and draw inferences. Using Qualtrics software to script surveys which involves designing logic and adding embedded data, as well as designing clean and modern edm/email campaigns using HTML coding. Adopted a customer focused mindset and approach to design surveys that are user friendly, and known among staff to be design-savvy, having a creative mind and being adaptive and proactive.

Education

Bootcamp Certificate: Monash University

A 24-week intensive Bootcamp course that provides the technical programming skills to build dynamic end-to-end web applications using HTML5, CSS, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelor of Business (Marketing) & Bachelor of Business (Management): Monash University
